How to Change Your Password

Change your password in 3DICOM

Overview

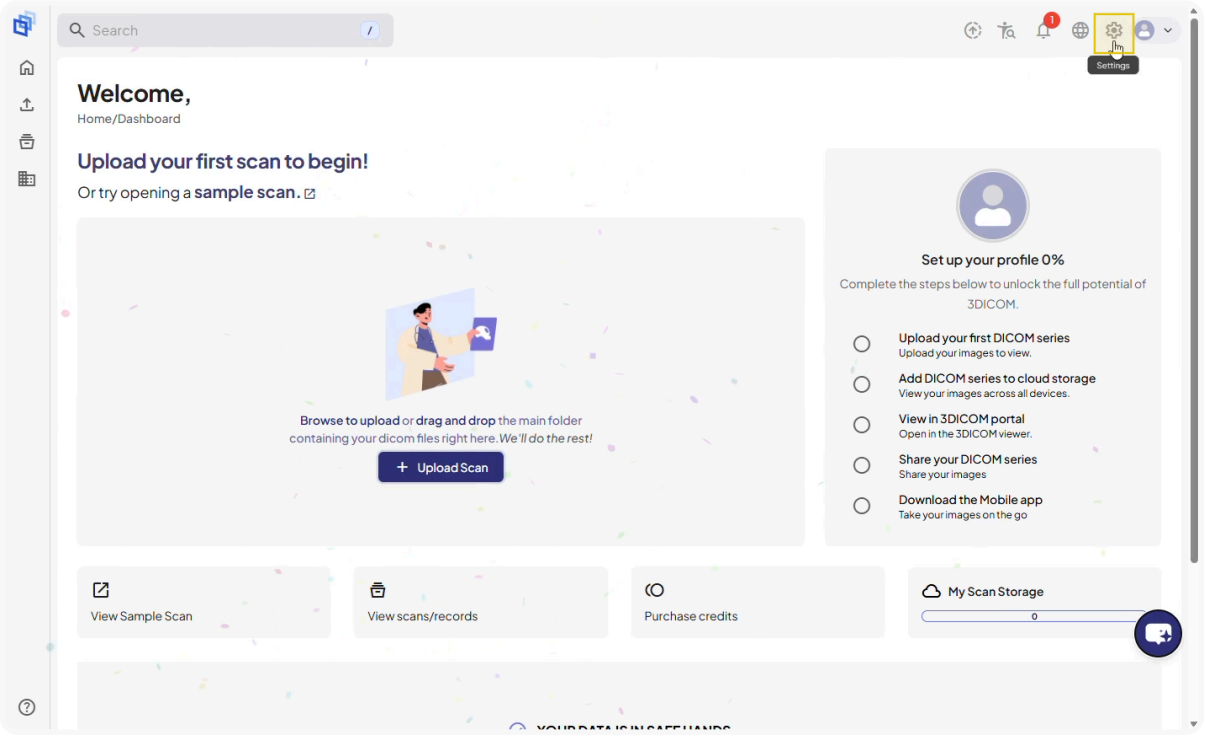
Learn how to change your password in 3DICOM using the in-app settings menu. This guide shows how to securely update your login details step by step.

Step-by-step instructions

Open settings

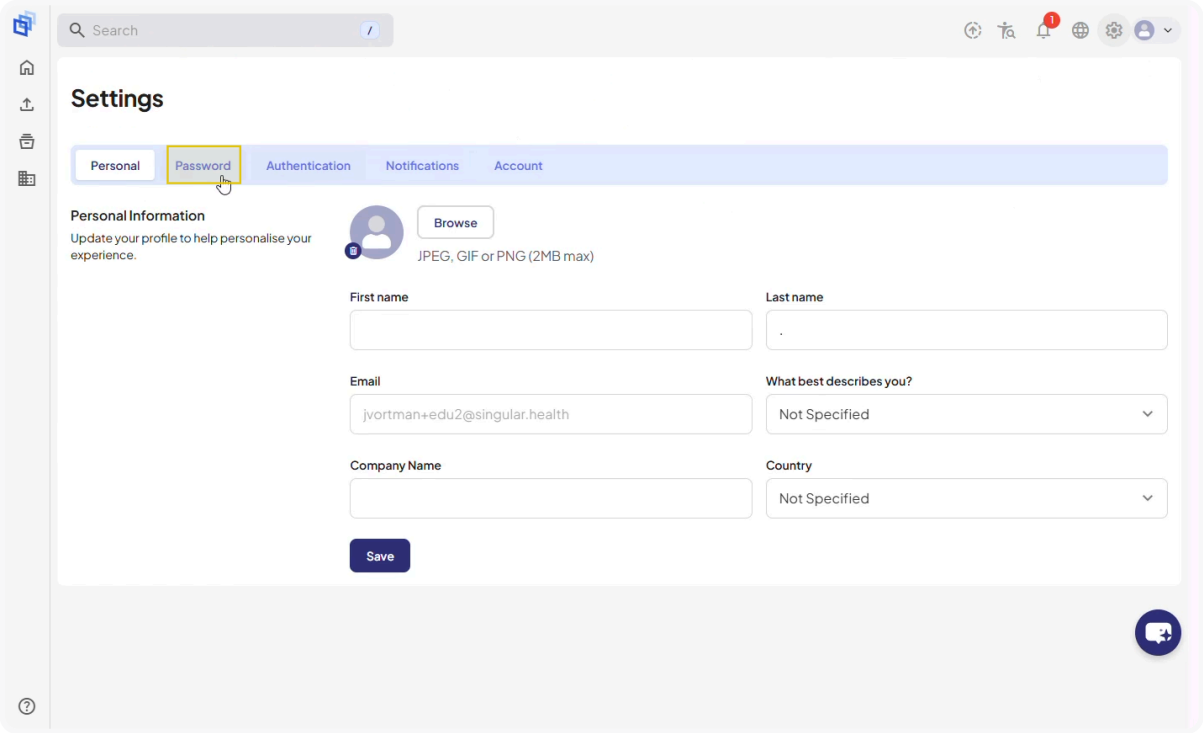
Step 1. Go to the welcome screen in 3DICOM.

Step 2. Click the **Settings** icon at the top right of the interface.



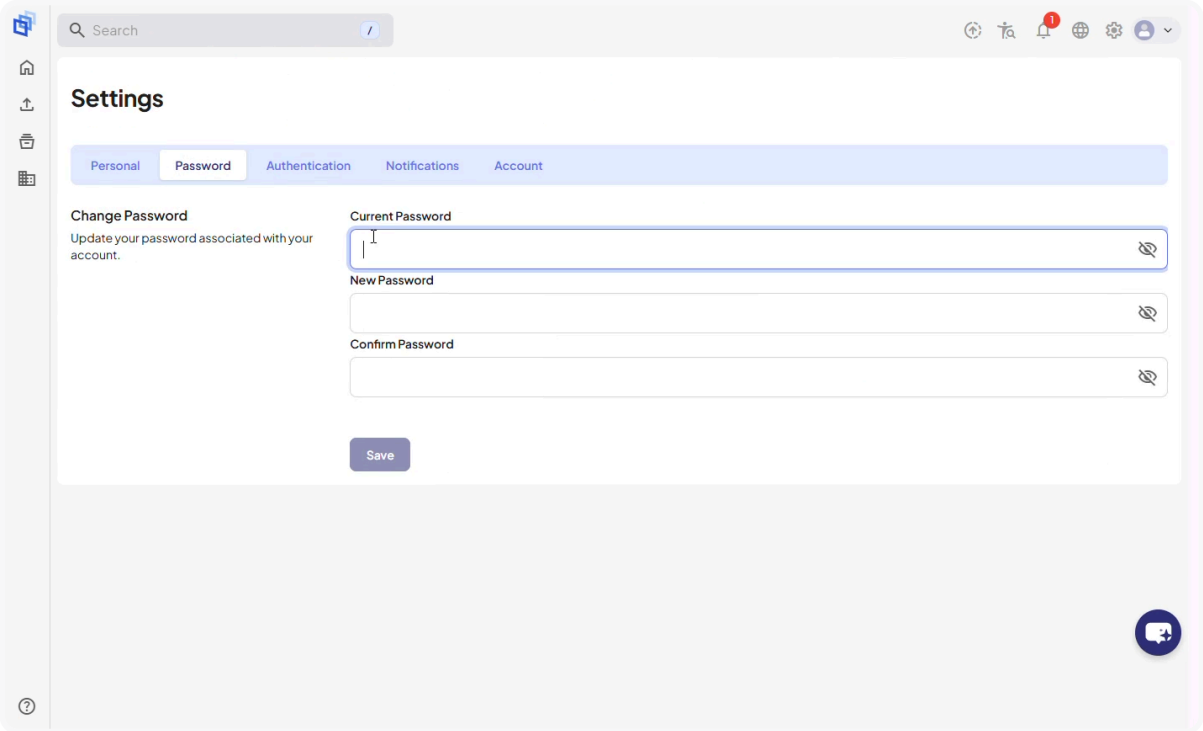
Open the password tab

Step 3. In **Settings**, select the **Password** tab to access the Change Password section.



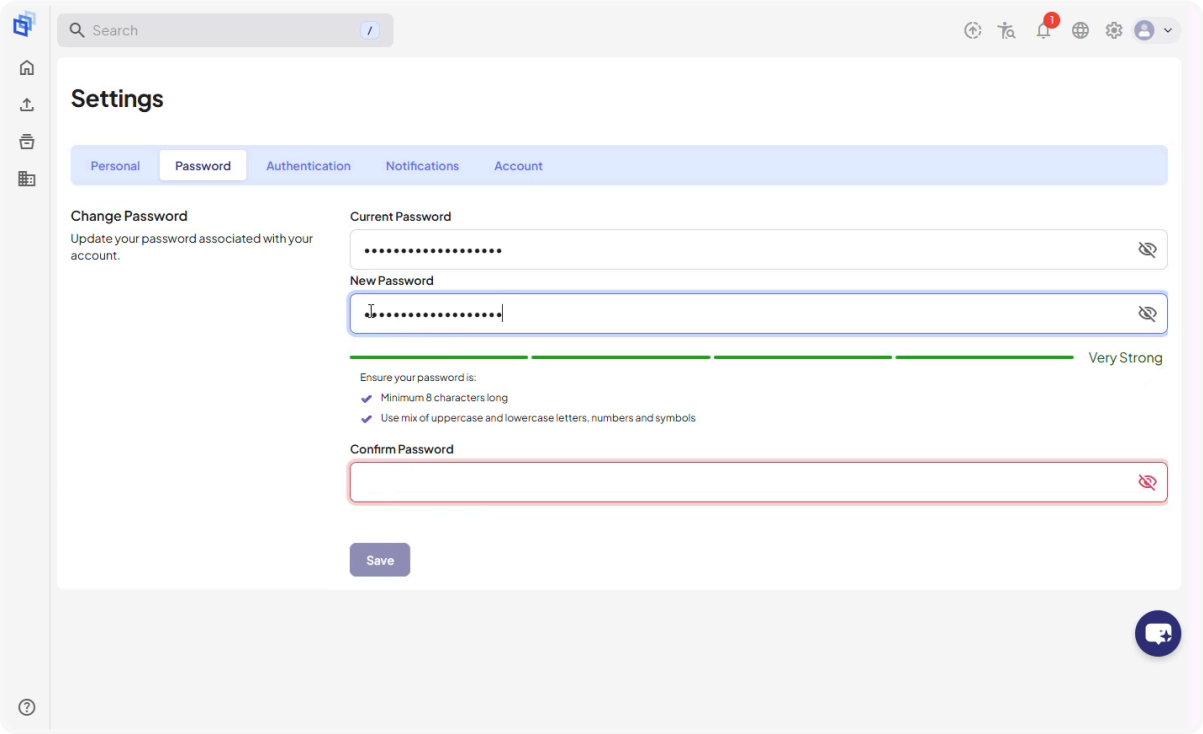
Enter your current password

Step 4. Click the **Current Password** field and enter your current or temporary password.

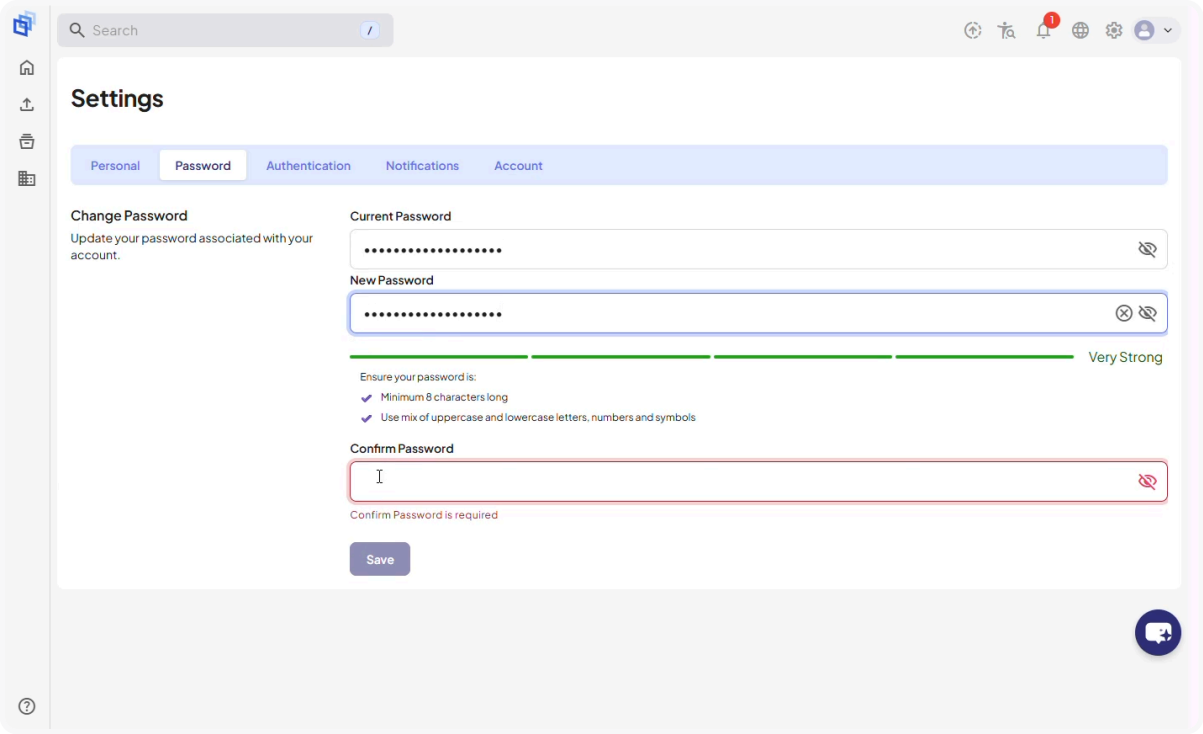


Enter your new password

Step 5. Click the field for your new password and type your new password. Follow the requirements shown below the field.



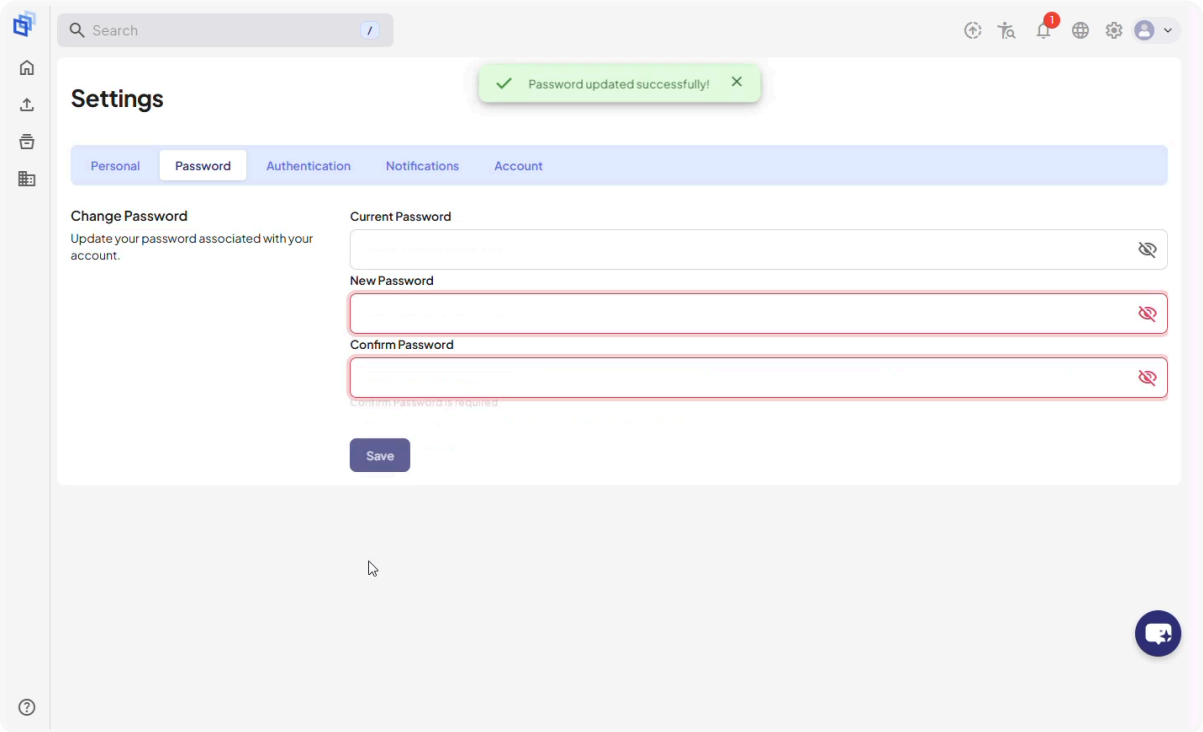
Step 6. Re-enter your new password to confirm.



Step 7. Click **Save** to update your password.

Confirmation

Step 8. When the change is successful, a confirmation message appears at the top of the screen.



Result

Your password has now been updated successfully in 3DICOM.
